# CI CD

CI/CD is the cornerstone of the telecom transformation. With CI/CD, delivery processes for new software versions and services can be automated – dramatically improving time-to-market and service agility. Find out more about CI/CD and the benefits it can create for your business.

## INCREASED EFFICIENCY

---

Zero touch deployment and testing  
Engineering and operations streamlined way-of-working  
Manage new services and increased traffic more efficiently

## REDUCED RISKS

---

Latest software release  
Remove risk that arise from manual ways of working  
Up-to-date security  
Gradual and frequent updates instead of large upgrade projects

## SERVICE AGILITY

---

Shorter time to market (TTM)  
Latest capabilities ready for activation  
Ready to address the diversity of new services

## OTHER BENEFITS

Improved code quality

Shorter time-to-market of new features

Automation to reduce costs and labour

The benefits of rapid feedback

Streamlined communication

Gathering metrics about application performance
